Endless Hot Water from BROTHERS! The Greatest Invention Since Running Water.

“I was late for school because I was in the shower too long!”....

TRUE STORY from a Brothers customer. This student knew how long to stay in the shower each morning by when he would run out of hot water. Once his parents purchased their new Noritz Tankless Water Heater from Brothers, he was in the hot shower for so long he lost track of time and was actually late for school! Another strong testimonial for both Brothers and Tankless Water Heaters. Never run out of hot water again with a Tankless Water Heater.

WHY BROTHERS?

We are the greater Charlotte area's experts in tankless water heaters and can help you determine which tankless system is for you. Brothers is the largest Noritz dealer in the Carolinas. Noritz is the #1 Tankless manufacturer in the world! Get professional installation and service from a company that's been around your neighborhood since 1985. Tankless done right. Get the best from the best.

**NORITZ**
ALWAYS HOT™

Water Treatment Solutions from BROTHERS. Because Water Quality is a Choice.

Pro Series Whole House Water Filter

Cleaner, healthier, better tasting water from every tap in your home.

- Dispenses a constant supply of clean, healthy water throughout your home
- Removes bad taste and odors by reducing chlorine, chloramines, carbon based organic compounds (VOC's) such as pesticides, herbicides and industrial solvents that can be found in tap water
- Reduces signs of aging and harmful health effects by eliminating chlorine from your baths and showers
- Allows minerals on showers and fixtures to be removed with just soap and water
- Extends the life of fixtures, faucets and pipes by reducing harsh chemicals in your water
- No need for bottled water – saves money, time and waste

Pro Series Water Softener System

Soft water throughout your entire home.

- Healthier and softer skin
- Brighter and softer clothes
- Leaves your shower and bath virtually spotless
- Makes hair shiny and more manageable
- Saves money on soaps and detergents
- Virtually spot-free dishes using less soap
- Maintain the efficiency of your water heater by reducing scale build-up
- Prolongs the life of all water using appliances as well as faucets and pipes

* Stop drinking bottled water. 17 million barrels of oil used annually to produce the plastic bottles in the U.S. Bottled water produces 1.5 million tons of plastic waste each year.

Pro Series Anti-Scale System

A green alternative to water softeners.

- Many of the same tangible benefits as a traditional water softener
- Saves water and energy as no electricity or back flush is required
- Doesn't require salt or potassium refills
- Allowable in areas where traditional water softeners have been regulated

Pro Series POU Drinking Water System

One simple filter provides up to 500 gallons of clean, great tasting water from your sink.

- Removes bad taste and odor by reducing chlorine, chloramines, carbon based organic compounds (VOC's) such as pesticides, herbicides and industrial solvents
- Cartridge supplies up to 500 gallons before needing replacement (Approx. 1 year)
- No need for bottled water – saves money, time and waste

Pro Series Ultra Filtration System

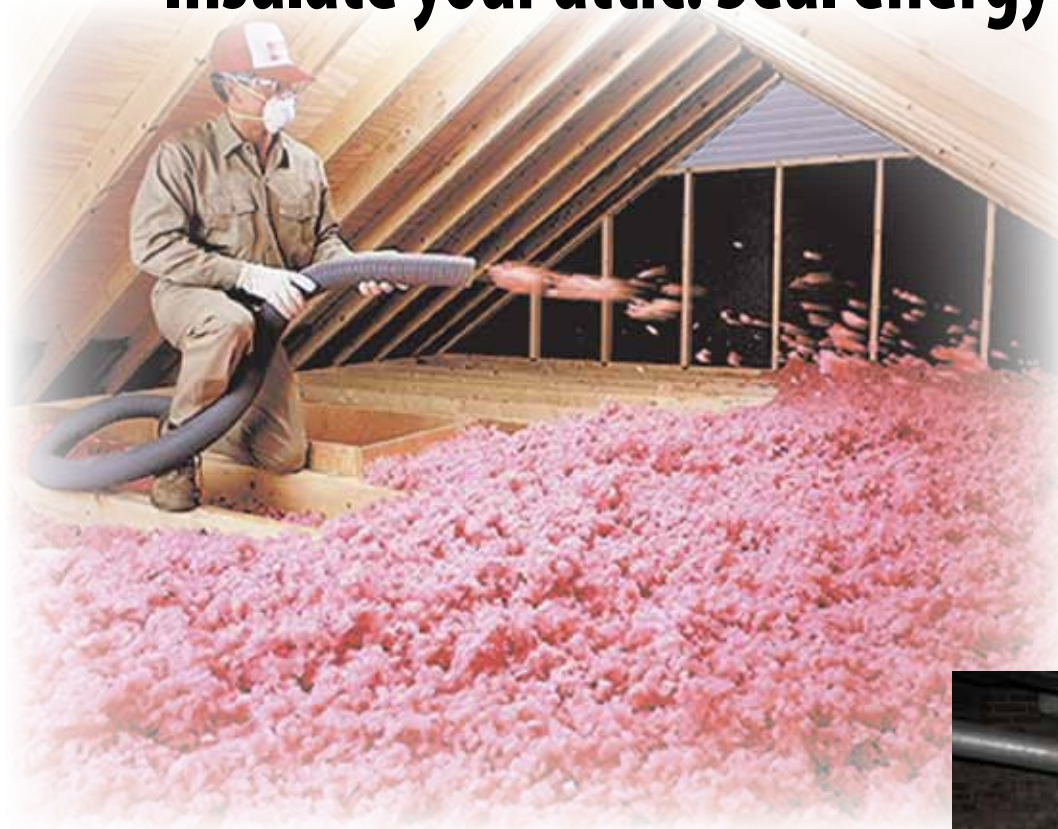

- The multi-bore Ultra Filter reduces 99.999% of solids – particles as small as .015 microns (1 strand of hair is 70 microns on average).
- Ultra filtration is a green alternative to RO systems as it does not generate anywhere near the water waste of RO systems
- Ultra filtration is frequently recommended by doctors for patients with weak immune systems such as cancer patients
- Ultra filtration extends the life of the media in the whole house carbon filter system by prefiltering the water

All systems carry a manufacturer backed 10 year warranty on parts. Whole house systems carry a five year warranty on media.

Duct Systems by BROTHERS. Seals air leaks. Master sealant. Save energy.

KNOW YOUR DUCTS

In houses with forced-air heating and cooling systems, ducts are used to distribute conditioned air throughout the house. But in typical houses, about 20% of the air that moves through the duct system is lost due to leaks, holes, and poorly connected ducts. The result is higher utility bills and difficulty keeping the house comfortable, no matter how the thermostat is set.

Some signs that your home may have leaky, poorly insulated, or inefficient ducts:

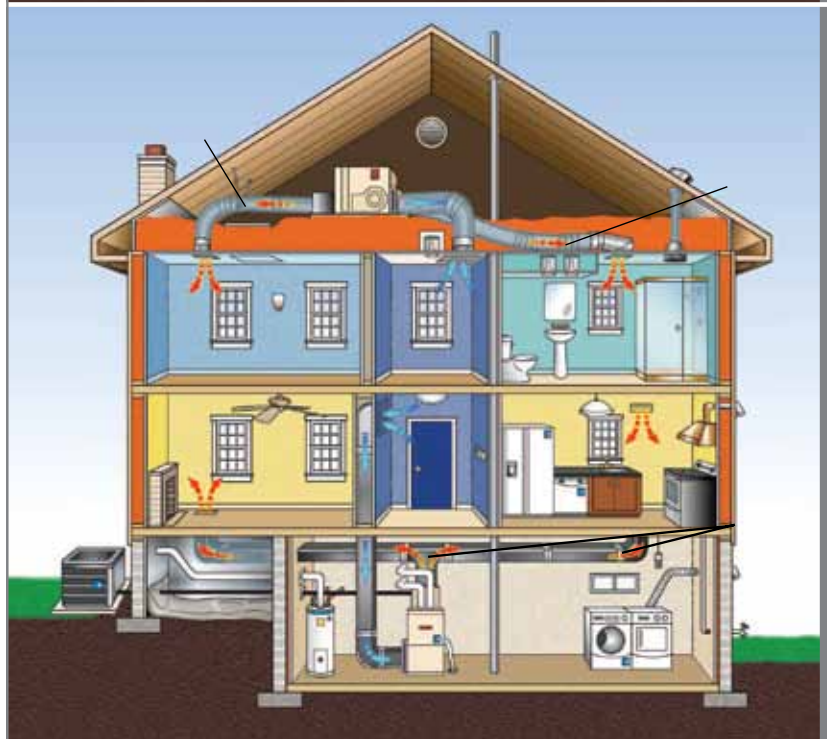

- you have high summer and winter utility bills;
- you have rooms that are difficult to heat and cool;
- you have stuffy rooms that never seem to feel comfortable;
- your ducts are located in an attic, unfinished basement, crawlspace, or the garage;
- you find tangled or kinked flexible ducts in your system.

SIMPLE STEPS TO IMPROVING DUCT PERFORMANCE

Because ducts are often concealed in walls, ceiling, attics, and basements, repairing them can be difficult. But there are things that you can do to improve duct performance in your house.

Start by sealing air leaks using mastic sealant or metal tape and insulating all the ducts that you can access. Never use duct tape, as it is not long-lasting.

Also, make sure that the connections at vents and registers are well-sealed where they meet the floors, walls, and ceiling. These are common locations to find leaks and disconnected ductwork.

Our EnergyMiser Air Scrubber™ removes 98% of Viruses, Mold, Bacteria and Odors from the air!

Provides a 99% Reduction of Bacteria

Provides a 99% Reduction of Viruses

Provides a 97% Reduction in Mold Spores

Reduces Gases & Odors by 85%

Kitchen counter top bacteria after 4 hours in normal air

Kitchen counter top bacteria after 4 hours of treated air

The Problem With Indoor Air.

Indoor air pollution is considered by the EPA to be America's No. 1 environmental health problem. Tightly sealed homes may be more energy efficient, but they also trap pollutants and microbes indoors causing allergies, odors, mold and illness.

Now Brothers has a solution. The EnergyMiser™ Air-Scrubber purification system is a three-stage process that has proven to drastically reduce odors, smoke, mold, fungi, chemical odors and bacteria

found on surfaces in the air and your home. Airborne bacteria and mold reduction has been tested at over 90%!

How does it work?

MERV-16* Filter rated Best Buy by Consumer Reports

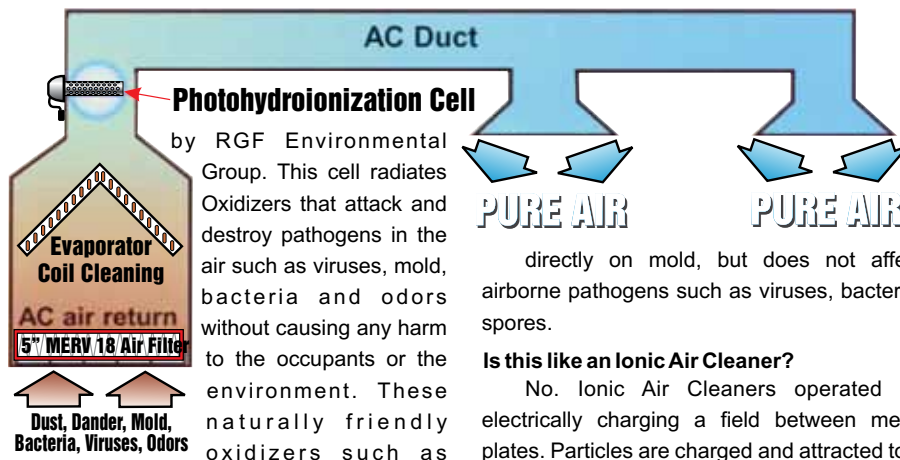

Step 1: We install a super-high efficient 5" thick, MERV-16* Air Filtration Unit, rated "Best Buy" by Consumer Reports, to remove airborne particles such as pollen, animal dander and household dust, from the air stream.

Step 2: We will do an intense cleaning of your Evaporator Coil and Pan to remove any algae, mold or slime buildup.

Evaporator Coil

Step3: We install the Air-Scrubber PHI Cell or Photohydroionization Cell manufactured and tested

by RGF Environmental Group. This cell radiates Oxidizers that attack and destroy pathogens in the air such as viruses, mold, bacteria and odors without causing any harm to the occupants or the environment. These naturally friendly oxidizers such as

Hydroxides, Hydro-peroxides, Ozonide Ions and Super Oxide Ions, then breaks themselves down into harmless oxygen & hydrogen. The system doesn't create any chemicals that remain in the air and it's completely harmless. The PHI Cell is installed in the duct work of your air-conditioner and is completely out of sight. Since the air in your home is exchanged every four hours, the unit completely scrubs the air to eliminate 98% of viruses, mold, bacteria and odors.

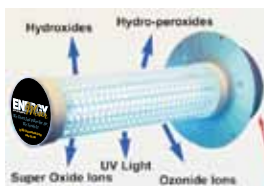

Isn't this just like those UV Lights?

No. Ultra Violet light is used when mold is discovered on an air-conditioner coil. UV light is effective only when shining

directly on mold, but does not affect airborne pathogens such as viruses, bacteria, spores.

Is this like an Ionic Air Cleaner?

No. Ionic Air Cleaners operated by electrically charging a field between metal plates. Particles are charged and attracted to a collection grid which must be cleaned on a regular schedule. Ionic cleaners only remove particles, not bacteria, viruses or mold.

Photohydroionization Cell

How will I know the PHI Cell is working?

You can smell the difference. In a test at a nursing home in Aiken, SC, where they had 34 elderly patients in diapers, this technology completely eliminated the odor within 48 hours of installation.

This product is approved by the USDA for food purification and approved by the Chinese Government as the only device which provides protection against the SARS Virus. Why risk getting sick?

Hydrate Your Home. Moisture when you need it. Humidifiers by BROTHERS. Honeywell

Our humidifiers are recommended if those living in your home experience:

- * Dry skin
