

1500 Package Heat Pump

The EnergyMiser™ brand 1500 Series, 15 SEER Package Heat Pump provides energy-efficient cooling and heating performance in one self-contained unit. This unit uses the environmentally friendly refrigerant R-410A, which is chlorine-free to help prevent damage to the ozone layer. The EnergyMiser™ 1500 Series is housed in a heavy-gauge, galvanized steel cabinet that offers a high-quality, UV-resistant powder-paint finish and allows for a ground-level or rooftop mount.

- Ultra-high-efficiency ComfortMiser™ Scroll Compressor with Sound Blanket
- Up to 15 SEER cooling efficiency, EnergyMiser's most efficient packaged unit
- Environmentally-friendly R-410A Refrigerant
- Heating performance of up to 8.2 HSPF
- Lifetime Limited Warranty on the compressor for the original, registered homeowner
- 10-Year Limited Warranty on all other functional parts EEM Motor
- Attractive louvered cabinet/coil guard
- Quality, powder-paint finish resists fading and corrosion
- Fully insulated blower compartment for quiet operation

Limited Lifetime Compressor Replacement Warranty**
if it ever fails
10 Year – Labor Warranty
10 Year – Parts Warranty

** Limited to the original purchaser of the equipment

DIMENSIONS					
Model	Med.	Large	W x D x H	B	H
1500-1524M41A	X		47" x 51" x 34"	16"	32"
1500-1536M41A	X		47" x 51" x 34"	16"	32"
1500-1548M41A		X	47" x 51" x 42"	18"	40"
1500-1560M41A		X	47" x 51" x 42"	18"	40"

R410a™ Tomorrow's Refrigerant Today! **What is R410A Refrigerant?** R-410A is an environmentally friendly, next-generation refrigerant that is used in the EnergyMiser™ brand air conditioners and heat pumps. Many refrigerants developed before R-410A contain chlorine, which is harmful to the ozone layer. R-410A is chlorine-free and therefore better for the environment. In fact, the Clean Air Act requires that as of 2010, all new air conditioners in the US must use R-410A. EnergyMiser™ meets tomorrow's energy standards today!

ComfortMiser Scroll™ compressors are guaranteed to last a lifetime because they function with fewer moving parts, and no discharge or intake valves. The scroll design allows several pockets of gas to be compressed simultaneously providing a smooth, nearly continuous compression cycle. This enables the ComfortMiser Scroll™ compressor to operate more smoothly and quietly, with less vibration. Plus it uses environment friendly R410A refrigerant.
