

PRO SERIES ULTRA FILTER

The ultimate option for the optimal water quality.

Finally there is an environmentally conscious solution for great water.

Activated carbon whole house filters do a great job of reducing and removing many of the harmful impurities found in our tap water, but you can do even more.

Many times health factors will require extreme water filtration. Perhaps you simply desire to have the best possible water throughout your entire home without the tremendous waste involved with a Reverse Osmosis system. The Pro Series Ultra Filter will accomplish your goals and is the perfect addition to a standard whole house carbon filter.

Pro Series Ultra Filter

Pro Series Ultra Filter

This hi-tech system is easily installed along side your whole house carbon filter to provide optimal water quality throughout your entire home.

Ultra Effective and Efficient

Flow rates: 15 gallons per minute assures you of constant ultimate quality water.

Self-cleaning: The Ultra Filter has a flush tank for backwash, the system's mechanical Ultra Filter is self cleaning.

Filter facts: Filtering down to .015 micron, the Ultra Filter removes particles 33 times finer than the next best system, assuring consistent high quality water.

Long-lasting: The Ultra Filter cartridge will run for **750,000 gallons** before requiring replacement.

Ask your local water treatment professional to review these features in more detail.

Eco-Friendly Factors

- Smallest footprint of any Ultra Filtration system.
- No more bottled water waste.
- Uses 1/10 the energy required for a water cooler.
- Backflush can be used for irrigation.
- Minimal amount of waste water generated compared to an RO System.

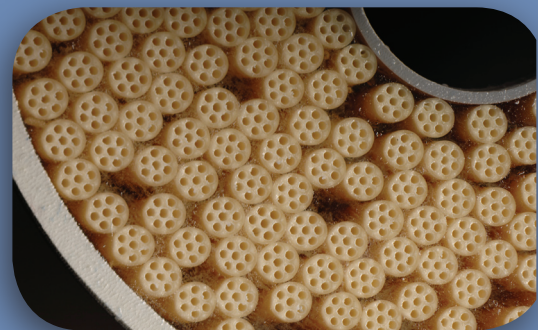

Cartridge Tested and Certified by NSF International against NSF/ANSI Standard 42 and 53 for the reduction of:

Standard No. 42: Aesthetic Effects
Nominal Particulate Reduction Class I
Standard No. 53: Health Effects
Cyst Reduction*
Turbidity Reduction

The Pro Series Ultra Filter is installed in tandem with a whole house carbon system. The Ultra Filter further reduces particulates down from the 5 micron level of the whole house carbon filter to .015 microns. To help give you a point of reference for the size of a micron, the average strand of hair is 30 microns.

The Pro Series Ultra Filter is a green alternative to traditional RO systems that produce tremendous water waste. The system requires minimal electricity and because no chemicals are used in the filtration process, the backflush water can be used for irrigation. The cartridge works for 750,000 gallons and then it can be replaced by your service provider.

The multi-bore ultra filter reduces 99.999% of solids – particles as small as .015 microns. This substantially reduces the microbiological contaminants, providing healthy drinking water throughout the house. *
